FURS WANTED

Our demand for furs has become so large that we are compelled to pay top market prices to get them. You will benefit by making shipments to the American Hide & Fur Co. of Calgary. Our top prices do not remain only on our price lists but our returns will convince you.

Coyotes and Badgers up to \$30.00
Weasels up to \$4.50. Lynx up to \$50.00
Minks up to \$25.00. Jack Rabbits 40c.

You will get these prices for quality and size.

Remember the house you ship to:

American Hide & Fur Co.

Corner 6th Avenue and 4th St. East, Calgary, Alta.

Maintain the Quality of Alberta's Crops**Better Seed means****Better Yields — Better Grades — Better Prices**

A special committee appointed by the Minister of Agriculture, with the co-operation of numerous organizations in the province, is urging the use this spring by farmers throughout the province of—

high quality, clean, treated, seed grain,

in order to reduce the heavy annual losses sustained by sowing inferior seed.

Farmers can co-operate by

1. Using registered seed wherever possible.
2. Having seed tested for germination and purity.
3. Treating seed for smut.
4. Thoroughly cleaning all grain intended for seed.
5. Seeding only varieties of recognized quality and varieties suitable to the district.

Good seed will be in demand this spring. Secure your requirements early—before the supply is exhausted.

U. F. A. Local, Boards of Trade, The Wheat Pool, Banks, Commercial Grain Firms, the Press, and many other organizations are working in co-operation with a

BETTER SEED COMMITTEE

consisting of representative of the Provincial Department of Agriculture, the Dominion Seed Branch, the Canadian Seed Growers' Association, The Alberta Seed Growers' Association, the C.P.R. Agricultural Department and the University of Alberta.

D. A. McDaniel, Provincial Publicity Commissioner, Edmonton, Secretary

--BIG--**Community Horse Sale**

at Economy Barn, Claresholm

Saturday, March 24

AT 2 O'CLOCK P. M.

Horses have been listed by prominent ranchers, some ranging from 1400 to 1700 lbs.

Farmers, get your horses into sale ring shape, to get the highest prices.

Communicate with J. H. Thorne, Clerk; or
F. B. Seymour, Auctioneer, Phone 2309.

Claresholm Local News

M. H. Arnestad returned last Saturday from an extended business trip to the coast.

The Ladies of St. John's Guild will hold their annual Easter tea on Saturday, April 7th.

The Sunshine Club met at the home of Mrs. James Campbell of Woodhouse on Wednesday. One new member was admitted.

Those who attended the short course in millinery put on by the Willow Creek W. I. this week, report a very successful time.

The Sunshine Club has arranged to hold a dance in the I.O.O.F. hall on Friday night, March 30. Good music and good lunch are promised.

Farmers in this district are taking a great deal of interest in the farm tractor schools this spring, and quite a number are purchasing tractors.

The orchestra from the Highwood theater, High River, added much to the enjoyment of those attending the Joan of Arc picture at the Rex theater this week.

At the meeting of municipal representatives held in the council chamber on Wednesday it was decided to ask the government to send speakers here to present the matter of a municipal hospital.

The C. S. A. "Salubrities" will present their annual entertainment at the School of Agriculture on March 20. The program includes songs, choruses, tableaux, plays and skits. Dancing follows the program.

Mary Pickford in "My Best Girl" is booked for the Rex theater next Monday and Tuesday. Mary Pickford is by far the most popular actress in the movies and is in a long time since one of her pictures was shown in Claresholm.

With their exception of Tuesday and Wednesday, which were wintry with cold winds and snow flurries, the past week has been mild and springlike. Snow progress has been made with threshing the past week but for some time past.

Mrs. Oliver Mosley has received word that her father, J. W. Smith is ill, in the hospital at Los Angeles, California where the amputation of one leg was found necessary. He has been a sufferer from diabetes for several years past. Mr. Smith was one of the old timers of Claresholm district, but of late years has made his home in California.

F. B. Seymour, licensed auctioneer, is promoting a community sale, to be held at the Economy barn, Claresholm, on Saturday afternoon, March 24th, starting at 2 o'clock. Mr. Seymour is a qualified livestock man and is well known here, having resided in the district for the past 18 years. A fine lot of horses have already been listed for this sale, and outside buyers will be interested.

The annual supper given by the Ladies Aid of the United church on Wednesday evening was highly successful. The long tables set in Harrison hall were filled several times. The supper was splendid, and well served. The church was filled for the lecture "The Romance of Everyday Life" by Mrs. Nellie McClung, who illustrated her points with many humorous stories. Mrs. McClung's lectures are always worth while, and this one was no exception.

The Claresholm Horticultural Society was organized at the meeting held in Harrison hall on Tuesday evening, with the following officers: President, Hon. Geo. Hoadley, minister of agriculture; Gordon Walker M.L.A.; Mayor Ringrose, and A. Laurie, president of the board of trade; president, Dr. Mullin; vice-president, W. D. Munro; secretary-treasurer, Mrs. J. McAlpine; committee, Mrs. S. West, Mrs. Oliver Mosley, Mrs. E. E. Moffatt and J. T. Kingsley. The membership was set at one dollar.

LADIES CURLING CLUB

The Ladies Curling Club, extended a hearty invitation to all the gentlemen curlers, their wives and friends, to a social evening in the I. O. O. F. hall, on Thursday, 22nd March, at 8 o'clock prompt. Come and have a good time.

STARLINE W. I.

Starline W. I. met at Mrs. Claude Strang's on Thursday. Several very interesting items were on the program.

Mrs. Mulholland gave a report of the constituency conference held at Lethbridge last week.

The sixth lesson on the training of the child of pre-school age was given by Mrs. Lawrence Strang.

Miss Cragg read the paper written by her brother, which won first at Calgary in Canadian and international oratorical contest.

Meadow Creek News

March 5, 1928.

Mr. Cohen was branding at his Ranch on Saturday. Billy and Roger Oliver were the champion ropers. Mr. Cohen has bought a ranch at Maple Creek, Sask. Roger Oliver is to take charge of it about the first of April.

Neil Gray and Truman Maltby were halter breaking horses last week.

Mr. Etherington had a litter of eleven pure bred Yorks from one sow last week.

Threshing started last Saturday and was expected to be finished this week, but the snow delayed it.

The various bachelors of the Creek are ready for leap year proposals. It is to be thought that the ladies will not get any silk dresses.

Mrs. Richard Vadnais has returned home after a visit to her mother in Lethbridge.

Hilton Hacon was a visitor at the home of George Bell last Sunday.

Bill Gray was at his grandfather's for a few days last week. He says the cattle in the Mud Lake district are doing fine.

Some residents here are contemplating calling part of the road "Lover's Lane." The location is not yet fixed.

Ed. Dionne was at Mr. Bell's for some horses last week.

According to last week's news there are some more people who are anxious to attend school but the teacher is too busy with her first pupil to teach them. I guess the boys will have to find another school.

With last week's ending I sign off "For Me."

Notice of Preparation of Assessment Roll**TOWN OF CLARESHOLM ASSESSMENT ROLL 1928**

Notice is hereby given that the assessment roll of the Town of Claresholm for the year 1928, has been prepared and is now open for inspection at the office of the Secretary-Treasurer of the town from ten o'clock in the forenoon to four o'clock in the afternoon on every day which is not a public holiday, except Saturday, and on that day from ten o'clock in the forenoon until two o'clock in the afternoon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll or to the assessment of any property or to the assessed value placed upon any property, must within thirty days after the date of this notice lodge a complaint in writing with the Secretary-Treasurer of the town.

Dated this 3rd day of March, 1928.

Claude J. Amundsen,
Secretary-Treasurer.

Investors are invited to consult Mr. Thorne regarding sound investments.

Flying Comes Here To Stay And Conquest Of The Air Goes On Apace In Canada

Canadian fliers who may be anxious to attempt a transatlantic flight this summer will have much difficulty in securing permission from the federal government, because transatlantic hops are frowned upon in the Dominion on account of the aerial tragedies of 1927.

Legislation will be passed at the present session whereby licensees will have to be secured by pilots desiring to fly across the Atlantic. It will be extremely difficult to secure such a license.

Flying in the Dominion last year was more costly in dollars and in human life than ever before, no fewer than eleven pilots having been killed in flying accidents and yet no records were attempted or set by Canadians.

Flying has come to Canada to stay. It was born of the war when Col. William Avery Bishop, V.C., won every decoration possible for conspicuous gallantry and devotion to duty in shooting down seven to twenty enemy planes.

In these days of peace the conquest of the air goes on apace in the Dominion. The young men who reap the whirlwind in the war returned to Canada to earn their living as civilians. But the spirit of war never survived, and in a small but reasoned organization called the Royal Canadian Air Force the traditions of aerial navigation were carried on.

The young aviators, trained in war days, looked to the civil department of government for employment. They were needed and within two or three years of the close of the war many of them were in the Royal Canadian Air Force, detecting forest fires, locating smugglers on the frontiers, and mapping out by photography the new areas of the hinterlands.

Canada was quick to establish the necessary code of law for navigation of the air, and today the Dominion is safeguarded by a set of strict regulations governing the licensing of all mechanics, pilots, and the international flying signals and the inspection of aircraft.

The most conspicuous work done during the recent crowded years of flying history has been the survey work in which Canada has led the world. Last year more than 400,000 square miles of Canadian territory were photographed and mapped with accuracy which would be unguessed years and millions of dollars if done in the old way.

Parliament acknowledged Canada's future in the air was navigated by providing \$3,000,000 last year for air development. Cities are being encouraged to provide future air harbors, technical advisers from Great Britain have visited the Dominion to make recommendations for the future linking of the Empire by airways, and the postoffice department is taking the initial steps toward that will be an Atlantic-Pacific air route.

Red Ties In France

A girl living in Espinal, France, has been refused a marriage license because she has never been officially torn. She applied for a birth certificate, which is required before a marriage license can be issued, and the officials searched the records, but could find no trace of her birth having been entered. Her parents had apparently neglected to register her birth. She was informed that officially she was not born, and the wedding has had to be postponed.

Passenger: "Porter, is this a through train?"
Porter: "Nawash, she's just done commenced sail."

A hair from a man's head is slightly heavier than a woman's hair.

"Emm, can you hear the murmur of our souls?"
"No. You are mistaken. It is my stomach. I have indigestion."—Fleming's Balm, Munich.

Fisheries Of Alberta

Smaller Catch Is Reported For 1927

Over Preceding Year
The fisheries of Alberta were not so active last year as in 1926, when a catch of 7½ million pounds netted the fishermen \$740,000, an increase over 1925 of \$200,000. Estimates of the total 1927 catch are placed at about six million pounds, with prices running about the level of 1926. The Alberta fishing activity depends largely on the production of the Manitoba lakes. The chief markets for the fish are New York and Chicago, and the Manitoba fishing companies fill these needs. If the Manitoba catch falls off, greater activity is necessary in Alberta, but if the Manitoba fisheries are active, Alberta is left with a surplus demand to fill.

During the past year a whitest hatchery was built on Lesser Slave Lake, which, with Lake Athabasca, are the chief sources of supply.

Ship Carries Air Taxi

Passengers On West Indian Cruise May Take Side Trips In Plane

Passengers who sailed from New York on the North German-Lloyd liner Columbus for a cruise to the West Indies may, if they wish, take side trips in the air. When the vessel docked from Bremen, it carried between the funnels a huge silver and black Junkers hydroplane.

The pilot of the plane is Walter Hagen, not the golfer, but a German aviator. On the metal sides of the air taxi is lettered its name, *Colonia Troter*. Hammond declared that fares for the air-rouse seats will be about \$1 a minute.

Co-Operation Between Railways

Two Transcontinental Systems Will Stand Together In Promoting Welfare Of Dominion

Whole-hearted co-operation between the Canadian Pacific Railway and the Canadian National Railway is assured in everything that will make the greatness of Canada, E. W. Beatty, president of the C.P.R., and Sir Henry Thornton, president of the C.N.R., declared at Engineers' Club, Montreal.

The occasion was a presentation dinner to the staffs of both roads, who contributed to the success of the second (triennial) Empire Mining and Metallurgical congress, held last year in Canada.

"Something has been said of the co-operation between the two railways during the Mining congress," said Mr. Beatty, "and it has been talked of as though it was something to marvel about. It is not. In anything that is of common interest to the country and the railways you will, I think, be able to find the Canadian National and the Canadian Pacific Railways joining in support of that goal, whatever it may be."

On the question of co-operation, Sir Henry Thornton had the following to say: "Let me say that we in Canada are too few in number to quarrel, and too poor in capital to fight each other. The progress of our country will be best assured by the co-operation of all institutions within our bounds and by the joining of each section of our country in promoting the welfare of the Dominion. We shall stand shoulder to shoulder with the Canadian Pacific Railway in the protection that is necessary to preserve the revenues of our great transportation system."

Hinders Trade With India

H. R. Poussette, Canadian trade commissioner at Calcutta, writes that one factor that militates against the expansion of Canadian exports to India is the reluctance of Canadian manufacturers to send their representatives to visit the markets of India and Ceylon and the Middle East generally. Similar complaints have been made by other trade commissioners.

If Aulch, Ja could be translated into the Atlantic Ocean, it would fill all the space between the United States and Great Britain.

For Better Understanding

Sir Hugh Denison Deprecates War Talk in Britain and U.S.
Sir Hugh Denison, former commissioner for Australia in the United States, pleading before the English speaking Union for a better understanding between the United States and Great Britain, cautioned his hearers against war talk. Sir Hugh declared that Mr. Thompson no longer held the attitude of a belligerent. The former commissioner also made reference to Rear Admiral Plunkett's recent speech on the possibility of a war between Great Britain and the U.S. and urged the people of both countries to weigh such matters in the proper balance.

He urged steps to bring about closer relations through visits of statesmen, mentioning particularly Secretary Borch and industrialists of the two countries. "They would find much in common," he said, and by exchanging views it would do a great deal in smoothing out the little misunderstandings which arise occasionally."

He urged steps to bring about closer relations through visits of statesmen, mentioning particularly Secretary Borch and industrialists of the two countries.

He would find much in common," he said, and by exchanging views it would do a great deal in smoothing out the little misunderstandings which arise occasionally."

Declares Columbus Was Buried In America

Askes Sent To Mexico In 1542 Says Spaniard

Where is Christopher Columbus buried? That is the question.

Historians have been telling the world that his ashes are buried in Seville, Spain. But Diego M. A. Cocco, who attended the Pan-American convention, takes issue by asserting the remains are buried in America, specifically under the great cathedral in Santo Domingo City.

Diego Cocco says that the wife of Senor Columbus, son of the discoverer, petitioned Charles V. to remove the ashes of the discoverer from Valladolid, Spain to Santo Domingo, Dominican Republic, in return for the promise to be moved to Hispania America, according to his story, and in 1542 burial was effected under the altar of the cathedral in Santo Domingo City.

Many a man's financial goose has been cooked in a jack pot.

Canadian Sheep Breeders View The Future With The Utmost Confidence

Benefit Of Inoculation

Effect Of Inoculation Shown On The Yield Of Legume Crops

At several of the Experimental Farms in Canada tests have been made on the effect of inoculation on legume crop yield where legume bacteria were absent from the soil or present in insufficient numbers, and the results are summed up in a pamphlet on "Legume Inoculation" written by the Dominion Agricultural Experiment Station. In some cases the increase in yield resulting from inoculation were comparatively slight, but in many instances they were strikingly large. At the Kapuskasing experimental station two years after seeding, the inoculated alfalfa seed produced 3,145 pounds of dry matter per acre against 2,067 pounds produced from untreated seed. Results at the Beaveridge, Alberta, Station showed that 1,465 pounds of dry matter per acre against 1,067 pounds produced from untreated seed. Results at the Beaveridge, Alberta, Station showed that 1,465 pounds of dry matter per acre against 1,067 pounds produced from untreated seed. Results at the Beaveridge, Alberta, Station showed that 1,465 pounds of dry matter per acre against 1,067 pounds produced from untreated seed.

The pamphlet may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

A Valuable Fertilizer

The Relative Value Of Fresh and Rotted Manure

Weight for weight, rotted manure is more valuable than fresh manure as it contains percentages of plant food and has these elements in a more available condition. However, according to a new bulletin on "Manures and Fertilizers" written by F. T. W. Wright, the losses in rotting frequently outweigh the benefits. Generally speaking, the sooner the farmer gets his manure while still fresh into or onto the soil the better. Still there are times when the rotting of manure is an advantage. It is well suited for light and sandy soils as it tends to make them more compact and retentive of moisture. On clay soils, however, fresh manure is best as it improves their physical condition by opening them to the air and making them more friable. Fresh manure is also preferable for crops which have a long season of growth.

With crops having a short period of growth and where early marketing is a consideration rotted manure food is less likely to be remembered than when rotting manure is a large bulk of the manure should always be kept compact in order to reduce losses to the soil. The bulletin may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

Flower Improves With Age

Camellia Exhibited At London Show Changes Color Instead Of Fading

A new camellia named *Duchess* which improves as it gets older was one of the exhibits at the Royal Horticultural Society show. It is a medium-sized bush, mauve in color, striped with heliotropes. "As it becomes older," the grower said, "instead of fading, the tone changes to a delicate French grey, even more beautiful and artistic than its original coloring."

Another feature of the show was a little flower, *Daphne Indica Rubra*, which is said to be the sweetest smelling in the world.

Cause For Worry

Mr. Jones found Mrs. Smith, the victor's wife, in tears. "Whatever is the matter?" she asked, anxiously. "I'm worrying about Jim," said Mrs. Smith. "He's been trying all week to kill our cat, and as a last resource he told her up 2,000 feet in his plane. He said he would drop her over the side."

"Well, what is there to worry about?" "Lola," exclaimed the frantic woman. "Jim's not home yet, and the cat is."

Lady (interfering prospective help): I may tell you that we are vegetarians.

Girt (anxious to be engaged): I've attended that church all my life, mum.

The movie "Angie Laurie" was filmed in England and Scotland.

My Old Kentucky House" was composed by Stephen C. Foster.

Ten Thousand Snowshoers Meet

1—Snowshoers in full number. 2—A little diversion—the dance. 3—The dance. 4—The dance.

Around ten thousand snowshoers and their friends visited Montreal on the occasion of the 20th anniversary of the founding of the Canadian Snowshoers' Association, which was held at the city February 3-5.

The convention was held under the auspices of the United Snowshoers' Club of Montreal and was featured by a carnival, during which the grand snowshoe championship of the world was decided. His Worship Mayor Munn was the patron of the convention, and in its celebration a banquet was given at the City Hall, at which the snowshoers were the guests of the city, on Sunday evening, February 5.

A number of snowshoers traveled distances up to 500 miles on foot to Montreal, but the majority took advantage of the special facilities offered in excursions at reduced rates by the Canadian Pacific Railway.

With 120,000 more sheep in Canada

a year ago, George Gordon, of Oak Lake, Man., president of the Canadian Sheep Breeders' Association, at the annual meeting in Toronto, said that the future with every confidence for a greater increase in sheep production during the year. He spoke particularly of the conditions in Manitoba, where 40 years of wheat raising had resulted in very weedy land, which required the use of sheep to clean it up. For this reason, 120,000 sheep more than the present number could be successfully employed in Manitoba at this work. A committee had been appointed to interview the board of trade and the land and mortgage companies in Winnipeg to encourage the leasing of sheep on their farms to help clean the land. He outlined the good results of the four sheep raises in Manitoba. In districts in which they were held at one time supplied the worst grades of wool to be found in the country. Now conditions were entirely changed and over one thousand sheep were to be seen for sale in one place. The highest price paid for a pound of lamb was 80 cents, and a Manitoba bred ram sold for \$200. The prize pen of lambs sold for \$915, cents a pound and 200 grade ewes for \$155 each.

Mr. Gordon urged every shepherd to ship his wool to the Canadian Co-operative, it was very encouraging to hear the big sheep men from the ranches of Southern Alberta say that the rancher who had shipped his wool every year to this organization had done much better than the man who shipped once a year and got to the private trader the next. Sheep men should not hesitate to patronize their own organization when they know they do so much to find markets for their wool. He said that the last shipment of 250,000 pounds of wool to England was a great deal in opening up new markets and advertising Canadian wool. Last season approximately 5,000,000 pounds of wool, worth in value about one million dollars, was handled, and the prospects for 1928 prices were good.

Chief Stobbs, of McCreey, stated that the Dominion Government has removed some of the restrictions for importation of sheep from the United States owing to the prevalence of the foot and mouth disease in England. Reports received by the representatives from the several provinces were all of a gratifying character, particularly that from the Maritime, where a total of 28,262 lambs sold for a total of \$105,164. Pure bred ram lambs sold for \$20 to \$25; shorn lambs for \$25 to \$35; ewes, \$25 to \$30 and grades from \$10 to \$15.

The receipts for the year were \$21,710 and expenditure of \$15,106. There is a balance of \$6,604. The record of registration shows 12,269 sheep of which 5,377 are Shropshires, with 5,145 of the Dorset as the next in popularity. The total membership is 1,174 of whom 409 are in Ontario, 353 in Quebec, 61 in Manitoba, 53 in Saskatchewan, 104 in Alberta, and 11 in the United States. Among the total importations during the year of 428, there were 133 Shropshires, 60 Suffolk, 10 South Down, 20 Romney, 2 Cheviots, 15 Black Face, 8 Leicester, 10 Manulouville, 14 Morton.

The following officers were elected: President, Victor Sylvester, St. Hyacinthe, Quebec; vice-president, John Wilson, Innisfail, Alberta; secretary-treasurer, V. V. Wade.

It was decided to hold the next meeting in Quebec.

Pasture produced less than 800 tons of wool in the past year, and this is to be used in the making of carpets.

"Now, Max, give the little girl a kiss. Don't say 'Go on'."

"Leave him alone—he will do it spontaneously later."—Mogendore's Hysteria, Munich.

ANSWERS TO LAST WEEK'S QUESTIONS

407. The Basic Principles of Television?

Requires a moving element for gathering in sequence light from each small patch of a picture until entire picture has been traced, the focusing of these backscattered light waves onto a photo-electric cell, for conversion into corresponding electro-magnetic impulses, which can be amplified and broadcasted or sent over wires, and charged back into light waves at receiving end. If object seen is moving, and scanning mechanism can trace 10 complete pictures each second, and receiving mechanism responds in unison; owing to persistence of vision, we can have the moving picture brought into the home.

408. What Is the Photo-Electric Cell?

A special form of vacuum tube which produces a tiny electric current in exact proportion to amount of light passing through the cell window. It is coated on inside with a highly reflecting metal to shut out light and to conduct the tiny current. On this metal surface is a deposit of potassium, so sensitive to light that it emits a tiny electric current whenever light strikes it. The slightest variations in the intensity of the light entering the cell produce corresponding changes in its current output. These tiny impulses after passing through vacuum tube amplifiers can be transmitted by radio or by wire.

409. The Neon Gas-Filled Lamp?

Converts electro-magnetic waves into light waves of corresponding intensity. In latest application of television the amplified current is delivered to the neon lamp instead of loud speaker. The lamp responds and gives fluctuations of light intensity just as the loud speaker reproduces pulsations of air waves. These backscattered light waves are passed through a 24-inch revolving disc synchronized (moved in unison) with rotating speed of scanning eye at transmitting end. Each disc has 48 holes arranged spirally so the 48 holes will pass each other and trace successive lines of a picture literally painting a picture each revolution.

410. Latent Uses of Chromium (Stainless) Steel

Basic alloy of rustless steel is chromium, a grayish white and comparatively rare metal. More recent applications are cooking utensils, golf clubs, fishing reels, hunting knives, hand planes, door forgings, nuts, screws, bolts and washers; scissors, hatchets, blades, shovels, safety razor blades, old style razors, pocket knives, and surgical instruments. Chromium plating, hard and enduring, with bright, permanent luster, has begun to replace nickel plating in the motor car industry for exterior bright work, such as radiator shell, lamp frames, door handles—can be kept bright by simply wiping with a cloth.

411. What Is Finger Printing?

Inner surface of hand is traversed by delicate creases and ridges in various patterns. As these markings show no change from childhood to old age and are exactly alike for any two individuals, they furnish a positive means of identification throughout life, even after death. Impressions taken by placing tips of fingers on inked slab (or pad), then pressing them on slip of white paper. Impressions divided into four main types—arches, loops, whorls (circles) and composites (combining two or more of former patterns). Classification may be divided into as many as 1224 separate primary groups, and these further split into sub-groups.

412. Principal Uses of Finger Printing?

While the unchanging character of finger prints is employed principally in detection of crime, can be of untold value in commercial affairs. This method of identification is so dependable that all soldiers are now required to register their prints. In India the thumb mark has long been used in attesting transfer of property; registering of documents; advances to planters, and to laborers on account of wages; to contracts under emigration laws; to medical certificates to verify for persons examined; and to record identity of native pensioners; all tending to check frauds and impostures constantly attempted.

413. Should We All Be Finger Printed?

Universal finger print registration would especially benefit those record-mixing persons could be more easily traced, heirs to disputed legacies could establish their identity; finger prints placed on insurance policies at time of issue would prove positive evidence if identity of deceased were in dispute; annual crime loss would be reduced to a billion dollars; innocent persons accused of crime could prove their identity; and anyone carrying an identification card bearing his description, photograph, signature and finger print could establish his identity any time, anywhere, for business or other purposes.

Chinook Gossip

Joe Walshe has been busy moving to his new farm for the last week.

The little son of Frank Cisar was seriously hurt last week when a horse kicked him on the head.

G. D. Radke installed a new motor in his feed mill last Wednesday.

Clyde Marsh rented his farm to Rod McLeod a few days ago.

Mrs. James Daly moved to Gramin last week.

Emil Erdman and Paul Hemker returned from Havre, Montana, last Saturday, having been there on business.

Mrs. Ed. Dersch and son returned from the Clareholm hospital last week.

Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not looked on as lost; not is the money spent on better interior lighting.

Anything that increases the favor, that adds sales, that multiplies customers is very properly regarded as a good investment. Advertising is a good investment—just as plate glass windows are. Advertising sells more goods to more persons than shop windows do.

A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

Death and Destruction
When Dam Bursts

On March 13, the recently constructed St. Francis dam on the upper waters of the Santa Clara river, California, built by the city of Los Angeles as part of the municipal supply system, burst, flooding death and destruction the length of the valley.

Hundreds of people were killed. At the coroner's inquest 285 bodies were accounted for, and about as many more are reported missing. The property loss runs into millions of dollars.

Everything points to faulty construction as the cause of the disaster.

REVIEW-ADVERTISER OFFICE

Institute For Research Work

Federal Government Favors Immediate Forward Movement

Without dividing, the House adopted a resolution, moved by E. J. Carland (U.P.A., How River), favoring the establishment of a national research institute by the Dominion Government. During discussion, Hon. James Macdonald, Minister of Trade and Commerce, announced the Government intended to proceed with the building of the first wing of a national research institute on a ten-acre plot at the Ottawa experimental farm. Hon. K. B. Bennett, Opposition leader, urged care should be taken to see there was no duplication of activities in research work.

Canada should develop her industries through the establishment of a national research institute under the Dominion Government, Mr. Carland declared in supporting the resolution. "We have the brains in this country but we haven't learned to apply them to scientific research," said Mr. Carland.

No problem was more serious in Canada today than the "economic annual loss from grain rust, estimated at approximately \$20,000,000 a year. We need a bureau of standards, scientific research, co-ordination of research and the results of these efforts should be freely available. Last year Canada spent \$200,000 for research, the United States \$50,000,000 and Great Britain \$25,000,000.

Hon. Mr. Macdonald presented a "public consciousness" had been awakened to such an extent as to justify an immediate forward movement in the work of research.

The amount of \$750,000 provided in the estimates, said Mr. Macdonald, had been suggested by the national research council. After Mr. Carland's whole situation with the research council, Mr. Macdonald estimated that \$5,000,000 would be required during the next five or ten years period to construct and develop laboratories in Ottawa. The research council had been of the opinion that the first year's program would not necessitate any possible expenditure in excess of \$750,000.

The research council had recommended an annual increase from \$170,000 to \$300,000 for administration and the suggestion would be carried out.

"The building up of a trained staff to operate the laboratories will require time and will be a progressive affair," said Mr. Macdonald. Private research in Canada had done "valuable work" in respect to the research work being performed by various departments of the Government, there would be a gradual amalgamation of effort.

Lord Roberts' Retort

Famous General Had Ready Answer For Would Be

Lord Roberts once found himself among new friends in a London club. There was a very tall man present, who evidently believed himself to shine as a wit, asked every people's expense. On being introduced to Lord Roberts, the wit went down patently to his knees and remarked: "I have often heard of you, but—" shading his eyes with one hand, as though the famous general, being so small, could be seen with difficulty. "I have never seen you."

To this Lord Roberts promptly replied: "I have often heard of you, sir, but I have never heard of you."

Father: "Well, daughter, what did you learn in Sunday School today?"

Little Elsie: "That Susie Jones is going to have a party."

On July 8, 1894, there was but one practical application in the world.

"For a year I have been trying to get you to have a party for me, and now it is just your turn."

"Fancy asking me to pay that much money for a worn-out suit?"

Moustique, Charcoal.

W. N. W. 1721

CHINESE FOND OF DRAMA

Plays Written Hundreds Of Years Ago Are Still Used

Chinese are passionately fond of the drama, and in every Chinese town and village, plays are every day performed.

In the big cities the theatres are always full. In the small towns and villages the plays are given by travelling companies, who bring their properties with them. The title chosen is often in front of a temple, says a correspondent to the London Times, so that the gods can get a good view. Any great national festival will be the occasion of a play or some local dignitary will have a company to perform before him.

The old plays, written hundreds of years ago, are still the plays of today. Every one in the audience knows the plot and most of the words of a play before he goes to it. Acting in consequence consists in the making of formal gestures to represent certain actions and emotions; there is no attempt to make a play realistic. All gestures have become crystallized to such an extent that there is a definite and stereotyped manner for every emotion. Thus the whole interest of the play lies in the presentation of what is really a very dramatic and stirring drama, rather than to delight the eyes than to excite the emotions.

Here it is that the orchestra comes in. Besides accompanying the singers, it has to beat time for almost every movement of the actors. A man seated at his hand, the cymbals clashing together; he takes a step forward, a drum is beaten.

While not every movement and phrase are thus punctuated, all Chinese love a noise, and they will sit and listen to a drama going on incessantly. The violin and the cymbals, though occasionally the drums join in, and the cymbals, drums, and gong mark the movement of the actors. Thus, at almost every movement some instrument is at work.

A Chinese actor moves as an European or American. He glides about the stage. The most famous actor of the present time, Mei Lanfang, seems to float on air. Every one of his movements, however insignificant, is perfect. Mei Lanfang always takes female parts, like nearly all the most famous Chinese actors.

It Might Be Managed

President Of Film Company Had Help In Speculation

One of the "classic" stories of Hollywood is about the President of one of the big film companies who visited his studio on one of his semi-annual inspection trips. Walking up one of the stages, he noticed a wolf being "kissed" by a caucasian woman. "Stop!" he ordered, turning to the director. "For why you have this in this picture? A wolf looks like nothing. For why don't you have a lion—that's an animal!"

"But this scene is supposed to be in the Northwest," explained the director. "It's out in the woods—where you'd naturally expect to find a wolf. A lion would be found in this part of the world—in the Canadian Rockies."

"A lion would look much better in the picture," insisted the film magnate.

"But how could a lion get up in the Northwest?" protested the director. "We have to be logical."

"Well, couldn't he have escaped from somewhere?" suggested the film magnate, trying to be helpful.

Tons Of Shells Exploded

Loaded with ammunition, a motor ship travelling from Birmingham to London burst into flames. They kept burning for three hours and roared like an "artillery bombardment," in the midst of the explosion tons of shells, had been flung through the windows. He was killed, and four others who tried to rescue him were badly hurt.

The Stubbards Brute

The brute of two weeks came to her mother weeping bitterly.

"What's wrong now?" asked mamma.

"John's so stubborn," replied the daughter.

"Stubborn?"

"Yes—he—he says he don't want to do what he has to—big church funeral when he dies."

Schuyler: "You should always say 'Thanks' whenever anybody gives you anything."

Burger: "How about when a person gives you a pain?"

American machinery leads in South Africa, according to investigations of manufacturers.

Nerve Tests For Airman

French Pilots Put Through Examination Every Six Months

All the sensations most aviators get in a lifetime are reproduced in a special laboratory at Le Bourget, where pilots are put through an examination.

Every man who takes a machine out of the aerodrome is put through a test every six months. First of all, the pilot is seated in a pivoted chair, which is swiftly revolved to test his sense of equilibrium. Then he has to walk ten yards in a straight line with eyes closed, balance himself on his toes, and stand on one leg and give a "high kick" with the other without staggering.

Nervous reactions are recorded electrically by various devices in the left, blindfolded and seated in an office chair, which is suddenly tipped back and forward without warning.

Quickness of vision and thought are tested by a special clock, which records how many hundredths of a second it takes a man to press a button after a signal light has been flashed in a dark tunnel.

The effects which various altitudes have on the pilot are noted by placing him in a sealed steel and glass chamber, from which air is expelled to reproduce the atmospheric conditions at all heights up to 35,000 feet, which is approximately the world's altitude record. The temperature falls three degrees Fahrenheit for every 1,000 feet of altitude.

At 12,000 feet most people begin to feel headachy and their hearts begin to pump faster; at 15,000 feet it is impossible to whistle; and at 21,000 feet a ringing bell cannot be heard. It has been found that a telephone ceases to operate at this height.

The doctors at Le Bourget claim that there has been no accident in the air through physical collapse of pilots, who have been frequently examined at the laboratory, and it has been suggested that, if motorists are subjected to a similar system of intensive examination, the number of road accidents would be speedily reduced.

Warm Feed For Hogs

Methods Of Feeding Meat To Pigs In Cold Weather

That it pays to give pigs warm feed in cold weather was shown in a test made at the Kennebec, Nova Scotia, Experimental Station. The pigs were divided into four lots as equal in weight as possible. Each lot received an equal quantity of meat, roots, and milk, and had access to water as required. The methods of feeding the meat were as follows: Lot 1 received meat fed dry and lot 2, meat in water. Lot 3 received meat soaked from one foot to the next was fed cold, and lot 4 and warm to lot 4. The lot fed dry meat did not do as well as the three lots fed soup. Lot 4 did best, indicating that for cold weather warming the feed is profitable.

If men were compelled to bury their faults the undertakers would have to work overtime.

Too many men who have good ideas are unable to make good.

WHERE VEGETABLES ORIGINALLY CAME FROM

Things People Eat Every Day Gathered From Many Countries

If a census were taken on the subject of vegetable preferences, the humble potato would probably receive the highest honors.

The potato, like a number of other vegetables, reached Britain's shores on the return of some adventures, says an article in T.N.T. bits.

Three centuries ago Sir Walter Raleigh brought the potato from Virginia. Some of the tubers were intro-duced to Ireland, where they grew and multiplied, furnishing Irish men with staple product. Later a ship carrying potatoes was wrecked off the Loughsborough coast. The fisher-folks planted the tubers washed ashore, and the potato soon became an everyday article of food.

The Romans introduced the turnip to the British Isles, and the turnip country specimens which, according to ancient chronicles, weighed forty to fifty pounds each.

The cucumber is older still. It was in everyday use in China centuries before the birth of Christ. It seems to have been known first in India, which would seem to prove that it flourished there before the dawn of recorded history.

From Persia comes the tomato, which originally grew wild on the seashore. The Peruvian gardeners cultivated it with such success that it came to be known as the tomato, and later to Europe.

Broad beans and green peas came from Asia Minor.

An Englishman travelling in Egypt about the end of the sixteenth century, noticed a vegetable which he compared to the Egyptian bean, but with which he was unacquainted. It was the cauliflower. With some difficulty he procured some seeds, which he intended to try to grow in England. They were lost in transit, however, and so the cauliflower was not made known to us until a century later, when it was brought over from Greece.

The carrot once grew wild in Greece, where it was used only as fodder for cattle and for hares. Gradually its use as a vegetable became known in Rome, and at a later date in Britain.

Parasels were similarly depicted until a short while ago, and shallots brought over by the Crusaders were grown merely as a useful and effective antidote for snake-bites.

Travellers from Asia introduced the onion. The best imported onions come from Brittany, Tripoli, and Madeira, but none more delicate than those from Spain, the Spanish variety.

May Destroy "Pillar Of Salt"

The famous "Pillar Of Salt" identified as being "Lot's Wife of the Old Testament" story, is reported to be in danger of being torn down for the manufacture of salt by the people holding the concession to work the Dead Sea deposits. The threatened existence of this noted pillar is causing dismay in many quarters.

Scientific Survey Of Arctic Area Planned

Noble Proposes To Spend Several Weeks Studying Climate

General Umberto Nobile, designer, contractor and pilot of the airship Norge, in which the expedition of Captain Hjalmar Amundsen, Lincoln Ellsworth and General Nobile voyaged to the North Pole in 1926, has left for Germany and Russia to make final arrangements with the Governments of those countries for the Italian airship expedition with which he proposes to make scientific studies in the polar regions this summer.

General Nobile's plan is to conduct a thorough scientific survey of the Arctic regions. Contrary to what was done the last time, when the whole effort was concentrated on the dash across the polar waste from terra firma to terra firma, he proposes to remain for several weeks in the Arctic zone studying temperatures, climatic conditions, prevalent winds, magnetic compass variations and other phenomena, a knowledge of which in addition to having been a scientific interest, will have a great practical application, especially as these things affect the possibility of establishing air lines from America to Europe across the top of the world.

But all this requires the establishment of a permanent base at Spitzbergen, which, by courtesy of the Norwegian Government, is now being prepared. From this base, General Nobile plans to make repeated voyages to the polar regions, possibly accompanied by another attempt to reach Alaska.

With the exception of mechanics to tend the engines, the crew will be composed entirely of scientific men, who will take the observations which are the real object of the expedition.

London Shops Have Quere Restrictions

May Sell Apricot During Evening But Not Apples

Uncooked trips may be bought in England until 9.30 p.m., but cooked trips may be bought until 11 p.m., according to the report of a Government committee which has been investigating early shop closing emergency regulations which came in during the war.

If the committee has its way the restrictions that have been tightened up a bit and neither uncooked nor cooked trips could be bought from a retailer after 8 p.m. The regulations apply to tobacco, chocolates, various prepared foods and other articles and the Government intend to re-arrange the restrictions for the benefit of the public.

There are many difficult obstacles to overcome, the committee points out. The attention to be paid under the existing laws fruit sellers may sell apricots but not apples up to 11.30 p.m. The committee suggests that this would be to forbid the sale of both apples and apricots after 7 or 8 p.m.

Wild Turkeys For B.C.

Gane Board Has Imported Three As Food For Experiment

Three distinguished and well-known visitors have arrived at Victoria bearing the name of megalithic antiquaries. But that, according to Major Furber, chief provincial game inspector, is only the registered name. More commonly, the visitors are known as wild turkeys.

There are only three of them—two gobblers and a hen—but Major Furber hopes that they will be the nucleus of a colony which in years to come will number thousands.

Introduction of wild turkeys to Vancouver Island is another department of the British Columbia Game Board, which recently introduced muskrats. The mountain sheep are to be sent to the island. The birds have been liberated at the Gane Board's farm at Elk Lake, where care will be exercised to keep them in good health and special precautions will be taken to protect the young birds.

The wild turkeys were brought from Ohio.

Could Make It Speedy

Uncle Ben doesn't particularly like his chair on the porch of the general store. Down the street to a battery of yellow silver bars, adorned with portraits and signs, and related to a stop in front of the store.

"Key, Uncle," hawled one of the occupants. "May speed limit in this district."

Uncle Ben sat wrathfully into the dust. "Speed limit," he squeaked.

"That's it, not 'You follow'—that's what this town hall has got against 'You'!"

Fruit Growing On The Prairies

Optimistic Opinion Is Given On The Subject Of Fruit Growing In The West

Fruit plantations of good, well-flavored fruit yields soon will be the rule instead of the exception on Canadian prairie farms, in the opinion of W. H. Leslie, superintendent of the Dominion Experimental station at Morden, Man. Mr. Leslie made this prediction in an address broadcasted from the Western Soil Products exhibition, in Winnipeg. He told how fruit could be obtained and successfully cultivated, and declared persons interested in the experimental side would find it a fascinating pursuit, with strange and remarkable variations resulting from cross strains.

Mr. Leslie asserted an important start had been made in developing the sorts of apples, crabapples, plums and cherries which would flourish best on the prairies. This was more than had to be done in any new territory, not even excepting the famous fruit growing districts of Quebec and Ontario. Now that many types had been obtained which were "comfortable" in prairie gardens, he expected early prospects of the quality and quantity of fruit produced.

As an example of the thrills of surprise which might be expected in fruit grown from seeds, Mr. Leslie mentioned an apple of Russian origin. Its seedlings had matured fruit ranging from small ones to trees more than three inches across. Among them were red, white, green, yellow and russet, including sour and sweet, and acid.

Plums were yet more eccentric, as they had to be cross-pollinated. This year, new sorts of apples and plums from flowers grown in pots.

Cherries were crossed with sand, pine and choke cherries on the Morden farm.

Altogether more than 4,000 plum seedlings and more than 6,000 apple seedlings had been sent to Morden Experimental Station.

Morden was not specially favored in climate he claimed. Similar fruits must be grown through the prairie, though only in scattered districts to date.—Free Press.

Farm Canadian Way

Campaign In Argentina To Adapt Canada System Of Grain Handling

A nation-wide campaign for the adoption of the Canadian grain elevator system and grain marketing procedure in Argentina was inaugurated by Luis Julia, the president of the Rural Society of Argentina.

Mr. Dubois, who last year personally studied the distribution, storing and marketing of crops in Canada, believes that the adoption of the Canadian system is the only way to save the Argentine grain grower from the exploitation by dealers, through whose hands practically the entire Argentine grain crop passes before it reaches the miller or foreign buyer.

Another Foulbush Idea

A Daily Mail quoted the Bolshevik newspaper, the Soviet Woman, an announcement that little Russian girls must play with dolls.

It was asserted, represent the bourgeoisie idea of family life, awaken a love of motherhood and develop a taste for domestic duties, and therefore the Moscow Teachers' Union has banned them.

Would Welcome Plan

Great Britain would welcome an arrangement between the allied powers and Germany whereby a general evacuation of the Rhineland could be carried out before the period set in the Treaty of Versailles.

Banff Claims Youngest Musher

Banff claims the youngest western musher. Miss Gertrude Steele is the young lady's name. Morning ablutions and breakfast over, this ambitious three-year-old does her outdoor togs and ties forth in quest of Jack, her faithful sled and companion.

The latter is usually waiting around the kitchen and she seldom fails to be the sleigh where he stands patiently whilst she harnesses him. After making sure all is right, Miss Gertrude writes to the rear of the sleigh, then—"Mush Jack" and away they go.

Some time later, cheeks rosy from the run through the exhilarating air, the youthful musher returns home.

"Where have you been?" asks mother. "Oh! Miss and Jack munched down to the depot to see the train come in."

"Me and Jack munched to the depot and back." It is generally the reply. She munched, too, to the grocer's, the butcher's and the sweater number, and needed her to go. Gertrude and Jack are inseparable, morning and afternoon they are seen on the streets of Banff.

Canada's youngest musher is seen in action during the Banff Winter Carnival at present taking place.

The run through the exhilarating air, the youthful musher returns home.

"Where have you been?" asks mother. "Oh! Miss and Jack munched down to the depot to see the train come in."

WORLD HAPPENINGS BRIEFLY TOLD

The visit of their Excellencies Viscount and Lady Willingdon to the Pacific coast will take place late in April.

Repairs destined to prop up the famous Leaning Tower of Pisa will be undertaken shortly under the supervision of the Ministry of Education and Fine Arts.

Commander C. T. Beard, R.C.N., and Commander H. Chaspin, R.C.N., of the *Chaplain*, and Lieut.-Commander R. T. Agnew, R.C.N., of the *Vancouver*, the two new Canadian cruisers.

The population of British Columbia has increased to 565,000, according to the annual report of vital statistics for that year, tabled in the Legislature.

Hon. Gerald William Lascelles, brother of the Earl of Harewood and son of Viscount Lascelles, husband of Princess Mary, died recently in his 79th year.

Richard Kearton, noted naturalist whose writings and photographic close-ups of bird and animal life are widely known, died at his home in Surrey, England, aged 65.

Inauguration of a Federal subsidy to railways for carrying Canadian coal from British Columbia to Ontario and Quebec is sought by Charles Woodward, Liberal, Vancouver, in a resolution moved in the legislature.

The Moscow municipal council and other authorities are considering the launching of a "bicycle loan." The proceeds would provide large masses of Soviet citizens with reasonably priced home made bicycles.

Secretary of War Davis has announced he will ask Col. Charles A. Lindbergh to refrain from all stunt flying as his life is too valuable to aviation and the country. He will not ask Lindbergh to give up flying alto-

Japanese to the number of 475 were admitted to Canada during the fiscal year 1926-27. Of this number 115 were adult males, 259 adult females, and 110 children under 18. This information was given in answer to a question in the House of Commons.

Unter-Parasites Are Being Imported Into Orchard Regions

Drugs, which are being imported to protect the Okanagan fruit crop from destruction, Counter-parasites are being imported into the orchard regions to protect the drugs. The drugs indicate the codling moth and earwig.

The counter-parasites, according to H. Buckner, provincial entomologist, are "parasites of parasites" from Canada, Wash., the United States Government having offered to contribute them to the Canadian authorities. Parasites kill the codling moth and earwig have been effective work in the past, although they have not been used with great deal more care because of the danger of introducing secondary pests with them.

Because the codling moth is suppressed, growers fear that it may undergo about destruction as extensive as the earwig was. The earwig was introduced due to the activity of this pest were \$5,000,000 in 1926. Eight hundred carloads of apples were classified as "damaged" by the Yakima district name reason.

Pleased With Visit

Collogg Says Ottawa Visit Was Most Enjoyable He Ever Spent

Secretary of State Frank B. Kellogg, on his return to Washington, from his trip to Canada, said he never enjoyed a visit more in his life. Speaking of his reception at Ottawa, the secretary said that while Canadian hospitality was proverbial the manner in which he was received by the governor-general, Viscount Willingdon; the prime minister, Rt. Hon. J. Mackenzie King, and the officials and members of parliament, had been beyond his anticipation. The secretary was particularly interested in the Archives building at Ottawa, which he thought was one of the most interesting exhibits in the world.

FACTS ACROSS THE SEA

Image Of Woman Transmitted By Television For First Time

New worlds were opened up when scenes were flashed across the sea by the first transatlantic television transmission broadcast even by Jules Verne in his fanciful imagination. For the very first time the image of a woman was sent across despite the fact she still occupied a position in front of the glass screen that served as a focus to the light rays. It was a feat, however, which would allow mirror to make certain her hair had not become mussed in the excitement. Dummies and men's faces had been flashed across in previous years, but a few cameras to give the signal, inventor of the television explained he had difficulty in finding a woman willing to attempt to sit still for twenty minutes or half an hour in front of a transmitting camera.

From Baird's Television laboratories in London, direct into the receiving station at Hartsdale, New York, which had been rigged up for the occasion.

He said himself was the first artist to be invited to the White House by Mr. C. Cox, of the London Press Association staff for half an hour. Reports came back from the United States that Cox was showing up in the White House.

Then Mrs. Howe, wife of James Howe, of the London Bureau of the Associated Press, took her seat in the front row. She was wearing a pair of diamond slings, of 200 candlepower each.

Mr. Howe was excited as a boy who has heard detailed reports of the reception in the United States of the image of Mrs. Howe.

"I was so delighted," Bainbridge said. "It was a splendid demonstration as far as the subjects on which I have been concerned. These tests are the first of the kind, and they show the possibilities of the near future."

"It was the greatest thrill of my life," Mrs. Bainbridge told me my husband had been seen on the other side of the Atlantic." Mrs. Howe said she was in a glare and heat of the electric lights.

"I was so thrilled at the novelty of an effort to keep the temporary discomforts of the night."

**MANY MOTHERS
RECOMMEND THEM**

Baby's Own Tablets Are Fine
For Nervous, Sleepless
Children

own Tablets is spreading over the world. Mothers recommend them to other mothers and wherever they are known, they are being used. I have heard for these pleasant tasting tablets that promptly relieve the minor ailments of young children.

"Baby's Own Tablets are one of the best things I have ever used," says Mrs. Arthur T. Allen, of Auburn, Me. "My little girl was nervous and could not sleep. I tried the Tablets and she was relieved. She has no more trouble with constipation and nothing seems to help her. I had used the Tablets but a short time before her bowels were regular. All mothers should keep a box of Baby's Own Tablets for they are a valuable remedy."

Baby's Own Tablets are sold by druggists or will be mailed on receipt of price, 25 cents per box, by The C. W. Williams' Medicine Co., Birmingham, Ala.

Federal Grants For Fairs

Policy of Government Should Be Better Defined

Western members of parliament are in receipt of telegrams addressed to them from constituents in regard to the federal grants to class B fairs, and there is every indication that the policy of the government in this respect will be a subject of keen controversy in the coming session.

The difficulty arises out of the manner in which the grants are given. Some fairs receive assistance and others do not, and the government hitherto has declined to base the grants upon any principle.

Members declare that the grants should be given to all fairs which qualify as class B, or discontinue entirely.

Many a man who has made a fortune at everything else imagines that he is a success as a husband.

The man who is looking for trouble doesn't have to advertise for it.

Frostbites.
Minard's Liniment counteracts inflammation, eases the pain, soothes and heals.

Noted Indian Chief Dead

Narrowly Escaped - Being Buried Alive 25 Years Ago

Moses Brown, noted Indian chief of the Chehalis Reserve, B.C., is dead and buried this time, his fellow tribesmen say, the old man is unlikely to rise again.

The chief was almost buried alive 25 years ago. For two days the Indian villagers thought he was dead as a result of an accident. They placed the body in a coffin, prepared

Realizing that he was imprisoned, Moses began to beat furiously on the coffin, which was immediately broken open by the astonished Indians. The man supposedly dead walked home with the mourners, apparently none the worse for his experience.

Besides being known as a great medicine man among the Indians, Chief Moses was well educated. He could speak, read and write fluent English and also had a good knowledge of French, Spanish and Chinese.

Truth About Cancer

"Neither X-rays nor radium have ever cured, or will ever prove of service, as a cure of cancer. For of both of these appliances I have had many experiences."

"It is useless experimenting upon a disease unless we first of all know something of its natural history; and yet the general consensus of opinion amongst surgeons, which they have inherited from their predecessors, is that the cause of cancer is not known. So they continue to treat it by methods that apply only to a local outlet, which, much to my regret, I have seen leading for a number of years before my eyes were opened to the folly of it."

"The fact remains that operative treatment for cancer has been proved a failure. And the immortal words from my knowledge of the disease

cancer in a single instance; but, the contrary, has only succeeded in aggravating the disease and adding to the sufferings of the poor patient; and also shortening his or her life, which latter, perhaps, might have been looked upon as a godsend in the circumstances."

"Now cancer is a blood disease and there is no gainsaying this—local manifestation being merely outcrop of the malady, the cause being prolonged toxic condition of blood."

—Love of humanity and truth

British cancer surgeon Dr. Robert Bell, M.D., F.R.C.P.S., &c., to add to his lucrative surgical practice, and with convincing proofs of above quoted statements this eminent authority successfully opposed the modern orthodox method of treating the deadliest known disease.

Before passing up at an advanced age in 1926, wishing to ameliorate the condition of cancer sufferers in Canada and the United States, Dr. Robert Bell kindly authorized the undersigned to publish his private works and personal letters in humanity's service as a book of valuable information concerning

The man who has millions of dollars doesn't control a single minute of his own life.

Source Is Still Unknown

"Cosmic Rays" Have Baffled Scientists For Many Years

Rays from the Milky Way were more than 30 times the penetrating power of X-rays, and which baffled scientists for more than 20 years since they were first suspected have now been described by Professor Miliken and Dr. Cameron, of the University of Chicago.

The inference made is that the stars searched the universe in an attempt to determine the source of their light. They describe their latest attention in California and on the heights of the Andes mountains in South America. They have tested the light from the stars without result. They have also tested the light from the sun, but they have gathered nothing from their trials in interstellar space.

The inference made is that the rays came to the earth from the edge of the universe, far beyond the stars. The rays have been traced to their origin 1,000,000,000 of years ago. The rays are believed to be electrical in origin, but to proceed with the same penetrative power would require an electro-magnetic force.

While a fairly thick coating of silver is impenetrable to X-rays, the coating can be detected behind a screen up to 16.7 feet thick, and

Alberta Liquor Profits

Profits Of Over Two Million Dollars On Government Sale Of Liquor

Net profits of \$2,038,622 on government sale of liquor were made in Alberta last year, according to the report of the Liquor Control Board which was laid on the table of House at Edmonton.

The report, covering the full calendar year of 1927, shows an increase of \$235,070 over the preceding year's profits. Gross sales amounted to

Improvement is noted in respect of violations of the liquor law. Convictions totalled 2,450, a decline from 3,539. The convictions for drunkenness were 1,095, or 117 less than the year before.

Law enforcement was strictly tried out and the officers on that travelled 130,000 miles.

The cost of law enforcement of liquor laws was \$100,626. Excess co-operation from the municipal police was reported.

That Alberta's liquor business made a satisfactory contribution to

the Dominion treasury is indicated by the report which puts the amount paid to the Federal government by the board and brewers of the province at \$2,534,000. This amount was paid in customs and excise and sales tax, etc.

CREAM OF TOMATO SOUP

2½ cups canned or fresh cut tomatoes.
1 small onion, sliced.
1 stalk celery, minced.
1 tablespoon minced parsley.
1 bay leaf.
2 whole cloves.
1 teaspoon salt.
1 teaspoon pepper.
1 teaspoon Sugar.
1½ teaspoon soda.
2 tablespoons butter.
2 tablespoons flour.

1½ cups water.

Add seasoning to tomatoes in simmer fifteen minutes, strain.

Melt butter in saucepan, stir in flour. Dilute milk with water, pour slowly into butter and flour, stir until it thickens. Continue to cook five minutes. Just before serving add soda to tomatoes, gradually tomatoes to white sauce, stir constantly, serve immediately.

All or any of the vegetable seasonings may be omitted, but their action gives a smooth, well-blended flavor to the soup.

How She Saved

A poor blind woman in Ireland has ten shillings into a plate at a missionary meeting. "You cannot afford so much," said one. "Yes, I can," answered. On being pressed to explain, she said, "I am blind, and asked my neighbor how much he spent for oil in his lamps in a year. He replied 'Ten shillings.' So I thought that I have saved so much better than I am blind, and do not need a candle, and I give it to shed light to the poor."

Back Seat Record

He had just bought a car. His wife went with him on a few excursions, and did not hesitate to enter her husband's driving.

"Hello, old man!" said a neighbor one evening. "I see you've got a new car. What do you get out of her?"

"About 40,000 words to the good answered the husband.

Some folks persist that a husband should be a delicate pink baby, but many are robust yellow.

U. G. G. BINDER TWINE

Order U. G. G. Binder Twine and make sure of the highest grade twine at the lowest possible prices.

On binder twine, as on other commodities, United Grain Growers Supplies Department gives good service and makes important savings to farmers.

Fine Memorials, Copings, Fences, Candy Slabs.

Freight paid to Claresholm. We guarantee what we sell.

Let me give you estimate on your new home, either Stucco or Concrete Block. Service and durability guaranteed.

THE WALL OF CHINA

In 214 B.C., the Chinese commenced building the Great Wall, which isolated their country from the rest of the world and helped retard their national progress.

The business man who maintains a wall of "digested reserve" towards the buying public is just as surely retarding his own business growth.

Your advertisement in The Review-Advertiser would be a standing invitation to your store. When our readers open up their paper do they see your "bid"?

**PUBLIC SALE OF LAND****DEPARTMENT OF MUNICIPAL AFFAIRS**

CHURCHES**UNITED CHURCH**

11 a.m.—Subject, "The great story of 60 years' work in Trinidad."

12:15—Sunday School.

7:30 p.m.—Subject, "Christ at the Round Table," by E. Stanley Jones.

Rev. R. W. Dalgleish.

ST. JOHN'S THE EVANGELIST CHURCH OF ENGLAND

There will be no services on Sunday next.

On Thursday, March 22nd, there will be evensong at 8 p.m.

On Monday, March 26th the Right Rev. R. Sherman, D.D., Bishop of Calgary, will hold a confirmation service at 8 p.m. This is a public service and all are welcome; there will be two reserved seats for the confirmees, the rest will be free seats for the public. There will be special singing for the occasion.

All are welcome. Bright service. An address will be given by the Bishop.

Rev. W. Barlow, L.Th.

THE CHURCH OF THE NAZARENE

"The Church is not a gallery for the exhibition of eminent Christians, but a school for the education of imperfect ones."

Sunday Services

11:30—"Jesus, The Great Intercessor"—the third in the series on "Intercessory Prayer."

7:30—"According to His Consistency."

10:30—Sabbath School.

Tuesday and Friday, 8 p.m.—Prayer meeting and Bible study. We invite you.

"Don't say away because it's hard to get ready; make it a matter of conscience and not of convenience."

Rev. A. H. Eggleston, Pastor.

The Welcome Sign

"Nobody asked you, sir," said the coy maiden. And in matters of buying, as well as in affairs of the heart, most people like to be "asked." Often, indeed, they insist on a proper invitation.

He is a wise merchant who keeps the welcome sign constantly before the community in the form of advertisements in The Review-Advertiser. There everybody sees it—for advertising is "the light of directed attention."

Speak up. Light up. Hundreds of good customers are listening for your message and watching for your welcome sign in The Review-Advertiser.

People Shop Where They Feel Welcome

Another PRICE Suggestion Maple Nut Cake and Chocolate Layer

THIS unusual, economical Maple Nut Cake will keep fresh for several days, and the Chocolate Layer Cake, made in a little different way with Dr. Price's Cream Baking Powder, is a family favorite root. Try one or both of them today!

(All measurements for all materials are level.)

MAPLE NUT CAKE

- 1 cup shortening
- 1 cup light brown sugar
- 2 eggs
- 1 1/2 cups milk
- 1 1/2 cups flour
- 2 teaspoons salt
- 2 teaspoons Dr. Price's Cream Baking Powder
- 1 cup chopped nuts—preferably pecans
- 1 teaspoon vanilla extract

Cream shortening, add sugar slowly and yolks of eggs and milk and beat well; add flour, salt and baking powder together and add chopped nuts, fold in beaten whites of eggs; add flavoring. Bake in well greased loaf pan in moderate oven 35 to 45 minutes. Cover top with maple icing and sprinkle with chopped nuts while still soft.

MAPLE ICING

- 1/4 teaspoon butter
- 1/4 teaspoon milk

Send for FREE Cook Book—"Table and Kitchen"—149 Notre Dame East, Winnipeg, Can.

DR. PRICE'S CREAM Baking Powder

Made from Cream of Tartar, derived from grapes. Raises the dough perfectly, giving the food fine texture and rich flavor.

MADE IN CANADA

- 1 1/2 cups conditioner's sugar
- 1/2 teaspoon Dr. Price's Baking Powder
- 1/4 teaspoon maple flavoring

Add butter to hot milk, add sugar slowly to make paste of the right consistency to spread; add flavoring, and baking powder and spread on top and sides of cake.

CHOCOLATE LAYER CAKE

- 1 cup shortening
- 1 cup sugar
- 1 egg
- 1 cup milk
- 1 1/2 cups flour
- 2 teaspoons salt
- 2 teaspoons Dr. Price's Cream Baking Powder
- 1/2 teaspoon vanilla extract

Cream shortening; add sugar gradually, beating well; add beaten egg, one-half the milk and mix well; add one-half the flour which has been sifted with salt and baking powder; add remainder of milk, then remainder of flour and flavoring. Beat also each addition. Bake in greased layer cake tin in moderate oven 15 to 20 minutes. Put together with

CHOCOLATE FILLING AND ICING

- 3 cups conditioner's sugar
- 1/2 cup milk
- 1 teaspoon vanilla extract
- 2 ounces unsweetened chocolate (3 squares)
- 1/4 teaspoon ground orange peel

To sugar add boiling water very slowly to make a smooth paste; add vanilla, melted chocolate and orange peel. Spread between layers and on top of cake.

DUNLOP TIRES

THAT splendid appearance of Dunlop Balloons is no guess-work. That rugged road resistance is not there by chance. That adequate resiliency was no blind selection.
